Examiner's Detailed Office Action

Response to Amendment

1. This Office Action is responsive to communication received on October 18, 2004, Amendment under 37 CFR § 1.111. Reconsideration and allowance of the present application 09/876,929, filed June 08, 2002, is respectfully requested by applicant. All such supporting documentation has been placed in applicant's file.
2. Claims 2 has been cancelled.
3. Claims 1, 3-41 have been examined.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Applicant's invention disclosed in claims 1, 3-41 is directed to nonstatutory subject matter i.e., an *abstract idea*. It is the examiner's position applicant's invention as claimed is not

Art Unit: 2121

limited to a *practical application* in the technological arts. The claims *appear* to be directed towards a method and apparatus performed on a computer. However, examination has revealed no computer or computer-readable medium has been disclosed by applicant.

5. This deficiency can lead to speculation that applicant's invention may to implemented on paper or by some other means not associated with a computing device. Examiner will not speculate as to the intended meaning, and will leave that to applicant to further clarify, since applicant discloses no "certain substances" that have been "transformed or reduced" that is, applicant claims disclose no *specific* computer or computer-readable medium.

6. Furthermore, there is no manipulation of *specific* data representing physical objects or activities constituting what one may classify as pre-computer activity, nor does applicant disclose any *specific* independent physical acts being performed by the invention constituting post-computer activity. As aforementioned, it is the examiner's position the claims as presented are nonstatutory, and merely manipulate *abstract ideas* in general without limitation to a practical application whereby "certain substances" are transformed or reduced on a computer or a computer-readable medium.

7. Therefore, claims 1, 3-41 are rejected under 35 USC § 101.

8. It should be noted that if the claims were amended to recite a "computer" or "computer implemented" method and apparatus the rejection under 35 USC § 101 would be withdrawn.
